WORK EXPERIENCE

Frontend Developer At Private Workspace, Kosad, Surat, Gujarat   **Oct 2024 - Present**

- I work in a private office that mainly focuses on freelance clients, delivering high-quality work tailored to their custom requirements across a variety of projects and domains.
- Our team includes developers skilled in React.js, Next.js, Vue.js, Nuxt.js, .NET Core Web API, and .NET Core MVC, along with DevOps experts managing server-side operations and deployments.

KEY RESPONSIBILITY IN PROJECTS:

1. **NOURIA'H:**

   - **Description:**
     - A web project with a fully responsive user interface and customized components.
     - The main goal is to provide a facility for chefs and restaurants to create live, dynamic food menus.
     - Menus are fully dynamic with on-page SEO implementation for better visibility.
     - Includes a CMS for users to create, update, and publish menus on the same domain.
     - Published menus are available on Google, making them easily searchable by others.
     - Menu themes are tailored for chefs, restaurants, and food truck owners who want their menus live and discoverable online.

   - **Role:**
     - Frontend Developer

   - **Language / Frameworks / Libraries:**
     - HTML, CSS, JavaScript, Vue Js 3, Nuxt Js 3, Pinia Store, Tailwind Css and Material Tailwind.

2. **Modelrecs:**

   - **Description:**
     - A web project designed as a social media platform for models and modeling enthusiasts.
     - Enables users to upload photos and videos to showcase their passion for modeling.
     - Includes core social features such as post creation, comments, likes, and shares.
     - Allows users to follow models and engage with their content.
     - The project is currently under development.

   - **Role:**
     - Frontend Developer

   - **Language / Frameworks / Libraries:**
     - HTML, CSS, JavaScript, Vue Js 3, Nuxt Js 3, Pinia Store, Tailwind Css, Material Tailwind and Nuxt UI.

Frontend Developer Intern At Infinity Brains, Vesu, Surat, Gujarat   **Jan 2024 - July 2024**

- Develops its own products such as Restroworld, Garba Jockey, Redprix, and an HRMS mobile application.
- Most products are focused on marketing and digital solutions.
- Includes a social media platform for restaurants to enhance engagement.
- Also built a social media marketing project dedicated to restaurant activities.

KEY RESPONSIBILITY IN PROJECTS:

- Handled the entire frontend development, including designing web pages, integrating APIs, managing backend data, fixing bugs, and adding new functionalities.
- Implemented payment gateways such as Cashfree and PayUMoney after conducting research and selecting the best resources.
- Redesigned one of the company's web projects, Redjinni, by creating all web pages and custom components.
- Ensured the Redjinni website was fully responsive across mobile, tablet, and large desktop devices.

- **Role:**
  - Frontend Developer Intern

- **Language / Frameworks / Libraries:**
  - HTML, CSS, JavaScript, Vue Js 2, Vuex Store, Tailwind Css, Bootstrap 5 and Node Js.
